ASSURED EXCELLENCE IN PROTEIN

Milk Sourcing

Strong Milk collection with 13 Milk Chilling Centres, 350+ Village Level Collection Centres and 5000+ Farmers join together to bring the Best Quality Fresh milk from the grass grazed cows, spread across 15+ Districts of Tamilnadu.

Field Level Monitoring of Cow 's Health and its Feeding Patterns gives us the ability to collect the Milk from Healthy Cows. By Keeping the Better Control and Direct Farmer Industry Linkage, We Deliver the Best Milk in the Market with Excellent Nutrition Profile to Give the Maximum Value for our Customers Money.

Quality

EnNutrica has the vision to provide better food products to the customers by complying with International Food safety, Hygienic standards to give Quality products.

We are Controlling the Quality at every point from the Farm (Source) to the table (End User). Everyone in the Supply Chain are trained and we ensure the Food Safety with Hygienic Practices and the importance of following the same.

- Primary: Basic Quality Control Lab at Village Level Collection Centre
- Secondary: Full Fledged Quality Control Lab at every chilling Centre
- Tertiary: Advanced Quality Control Lab at Manufacturing Plant.

Quality Assurance Department, Makes Every Person in our supply chain and processing to be social responsibility of the Products Produced and the Importance of principles and ethics to give a better product; now and always. External third-party audits are conducted periodically to ensure further quality and safety.
